

TOMMÜ – ŠKODA 130 LR&RS Connecting Rods

C-C Length	Big End Bore	Pin Size	Big End Width	Weight
139mm	48mm	18mm/20mm	23,9mm	571g

- I-Beam Connecting Rod.
- Center-to-Center Length 139mm (6mm longer compared to the original).
- Pin Size 18mm or 20mm available.
- Crank end guidance or piston end guidance available.
- Suitable for crankshafts with a stroke of 72mm (Škoda 130) or 78mm (Škoda Fabia).
- High-strength hardened steel with a tensile strength of over 1100MPa (760MPa measured on original ones).
- Made by die forging method - not a billet steel.
- Each connecting rod weight reduced up to 45g compared to the original (despite higher length).
- Set of 4pcs balanced weight $\pm 1g$.
- Dimensioned up to 9000RPM.
- Supplied with ARP2000 rod bolts.
- Can be ordered including bearings.

The draft was consulted with AČR Technical Commissioner. Connecting rods meet current technical regulations.
