

TOMMÜ – Tatra 87 Connecting Rods

C-C Length	Big End Bore	Pin Size	Big End Width	Weight
182mm	56-59mm	20mm	26,9mm	747g

- I-Beam Connecting Rod.
- Center-to-Center Length identical to the original (182mm).
- Variable Big End Bore for Crank Pin Diameter 53–56mm (can be custom made by customer request).
- High-strength hardened steel with a tensile strength of over 1100MPa (620MPa measured on original ones).
- Made by die forging method - not a billet steel.
- Each connecting rod weight reduced up to 250g compared to the original.
- Set of 8pcs balanced weight $\pm 1,5g$.
- Designed for using modern thin-walled bearings (can be also ordered).
